

Appl. No. 10/823,386
Amdt. dated April 11, 2006
Supplemental Reply to Office Action of 07/15/2005

PATENT

REMARKS/ARGUMENTS

This is in supplemental response to the Office Action dated July 15, 2005.

Reconsideration is respectfully requested.

This supplemental amendment provides two (2) dependent claims that were discovered as being omitted from the last amendment (new claims 88 and 89). In the last amendment, the Applicant substituted the broader phrase "physical location coordinates" for the narrower "Global Positioning System coordinates." Physical location coordinates include Global Positioning System coordinates, triangulation determined coordinates, geocentric and geodetic coordinates, Cartesian coordinates, polar coordinates, MAPSCO coordinates, or any other form of coordinates that describe a physical location. There is preferably a good accuracy of physical coordinates used, but accuracy of coordinates communicated is not necessary to distinguish Applicant's invention over the prior art.

Three (3) new claims (90-92) are respectfully submitted for consideration as part of this pending application. Claims 90-92 eliminate certain language while narrowing remaining aspects to more simply point out an embodiment of Applicant's invention over the references when using the narrower terminology "Global Positioning System coordinates."
